QUESTAR OVERTHRUST PIPELINE COMPLETES CAPACITY LEASE WITH KINDER MORGAN-SEMPRA TO BECOME WESTERNMOST SEGMENT OF ROCKIES EXPRESS

SALT LAKE CITY — Questar Overthrust Pipeline Company, a wholly-owned subsidiary of Questar Corporation (NYSE: STR), today announced it has finalized a 20-year capacity lease with the sponsors of Rockies Express – Kinder Morgan Energy Partners, L.P. (NYSE: KMP) and Sempra Pipelines & Storage, a unit of Sempra Energy (NYSE: SRE) – for up to 625 million cubic feet (MMcf) of natural gas per day. The agreement enables Overthrust to extend its system from the Kanda Station, near Rock Springs, Wyo., by adding compression and building 77 miles of 36-inch-diameter pipeline to an interconnection with Rockies Express (Entrega Pipeline) at the Wamsutter Hub in south-central Wyoming. As a result, Overthrust will become the westernmost segment of Rockies Express, providing seamless transportation from the Opal Hub in western Wyoming and other Rocky Mountain producing basins to eastern Ohio. Under the capacity lease, Rockies Express can request Overthrust to expand its system up to 1.5 billion cubic feet (Bcf) per day upon mutual agreement of pricing terms.

“This project is important to Questar for two reasons,” said Allan Bradley, President and CEO of Questar Pipeline Company. “First, we utilize our Overthrust Pipeline asset, improving returns on capital and generating meaningful new earnings from our pipeline business. Second, we provide shippers on Rockies Express with access to more than 3 Bcf per day of supply from the Opal hub, including growing

production from Pinedale and other Green River Basin fields – core areas for other Questar entities.” The Overthrust expansion to Wamsutter is expected to cost more than \$200 million and be completed by December 2007.

Questar Corp. is a natural gas-focused energy company with an enterprise value of \$7.1 billion. Headquartered in Salt Lake City, Questar finds, develops, produces, gathers, processes, transports and distributes natural gas.
