

**Cash rebates –
another way to
feel warm inside
this winter.**

Healthy cash rebates are still available from both Questar Gas and the Wyoming State Energy Office (www.wyomingrebates.com) when you buy energy efficient gas appliances.

For example, an ENERGY STAR® furnace qualifies for a \$300 rebate from Questar and a \$250 rebate from the Wyoming State Energy Office – for a limited time. That's a \$550 jackpot!

To find out what other savings you can expect, or to schedule a home energy audit that can improve your home's energy efficiency, visit ThermWise.com.

Jack Frost
is not a good guy,
even if he does wear white.

Therm to the rescue.

Jack Frost and Old Man Winter, those dastardly villains of the snowy season, never fail to return.

So it's time to get your Defender of Heat & Warmth ready for battle. (That would be your furnace.)

Therm, the Questar Gas Energy Wise Guy, has a host of winter prep hints, helps, tips and tidbits waiting for you at the aptly named **ThermWise.com** website.

Thermism:

"Furnaces are warm, wonderful and caring—kind of like Grandma, but without the shawl, because that would be a fire hazard."

How to get your furnace ready.

Try these five suggestions to get started.

- 1. Replace your furnace filter.**
It's only a couple of bucks, and can make a big difference in furnace efficiency.
- 2. Remove flammable/combustible materials from near your furnace.** I don't really need to explain why this is necessary, do I?
- 3. Give your furnace room to breathe.** You know how when you blow on a fire, it burns better? Same principle applies here. Oh, and make sure your air vents, cold-air returns and heat registers are clear.
- 4. Install a programmable thermostat.**
Your furnace won't have to work as hard while you're asleep or at work and you'll cut your energy costs.
- 5. Have your furnace inspected by a licensed heating contractor.**
Trust me, this is the quickest path to peace of mind. Besides, 'tis easier (and cheaper) to maintain, than to repair.

Refer to your local telephone directory for a qualified heating contractor.
